### **SUGGESTED FINISH MAINTENANCE PROCEDURE:**

1. Do not allow water spots to dry on the fixture. Keep the surface clean and dry after use.
2. Periodic cleaning can be done by applying isopropyl alcohol with a soft clean cloth to gently remove surface spots.
3. Never use cleaners with bleach, abrasives, or vinegar. Never use any type of abrasive pad or sponge.

### **ABOUT YOUR FINISH:**

These finishes are the most durable finishes Waterstone offers. The best general maintenance is regular cleaning. Even though these finishes are considered durable, you can never use any abrasive type cleaners, clothes, or pads to clean your fixture. Always try and keep your finishes clean and dry. Trapped moisture on the surface of your finish can lead to staining. Astringent cleaners, chlorine, bleach, along with acidic based organic cleansers are potentially harmful to these finishes. Chrome plated finishes are very tarnish resistant. However, they are not indestructible and can scratch and mar.

### **IMPORTANT NOTICE:**

It is the responsibility of the customer to check for any material finish defects **BEFORE** installation.
